

Above 3d visuals of the building before work began

Ludlow Boxing Club June 2013

Work is well underway and the new Boxing Club at Wheeler Road is progressing well, despite the adverse weather of 2012 and winter conditions. The outer skin of the building is almost weather tight with just the external doors needed to be fitted.

Much of the internal work is still needed as you can see from the images to the right and below, the skeleton is in place, however plasterwork, doors and ceilings need to be installed.

A community room when finished will be available to hire by local organisations and for residents meetings and family gatherings.

A lot of work is still needed to complete this community project. Funds are very low and more is needed in order for it to be completed. If you are willing to donate some money to complete the project please contact Flo Hadley at: flo.hadley@btinternet.com
